

CVAT Team Performance & Monitoring

How to monitor team activity and performance in CVAT

In CVAT Cloud, you can track a variety of metrics reflecting the team’s productivity and the pace of annotation with the **Performance** feature.

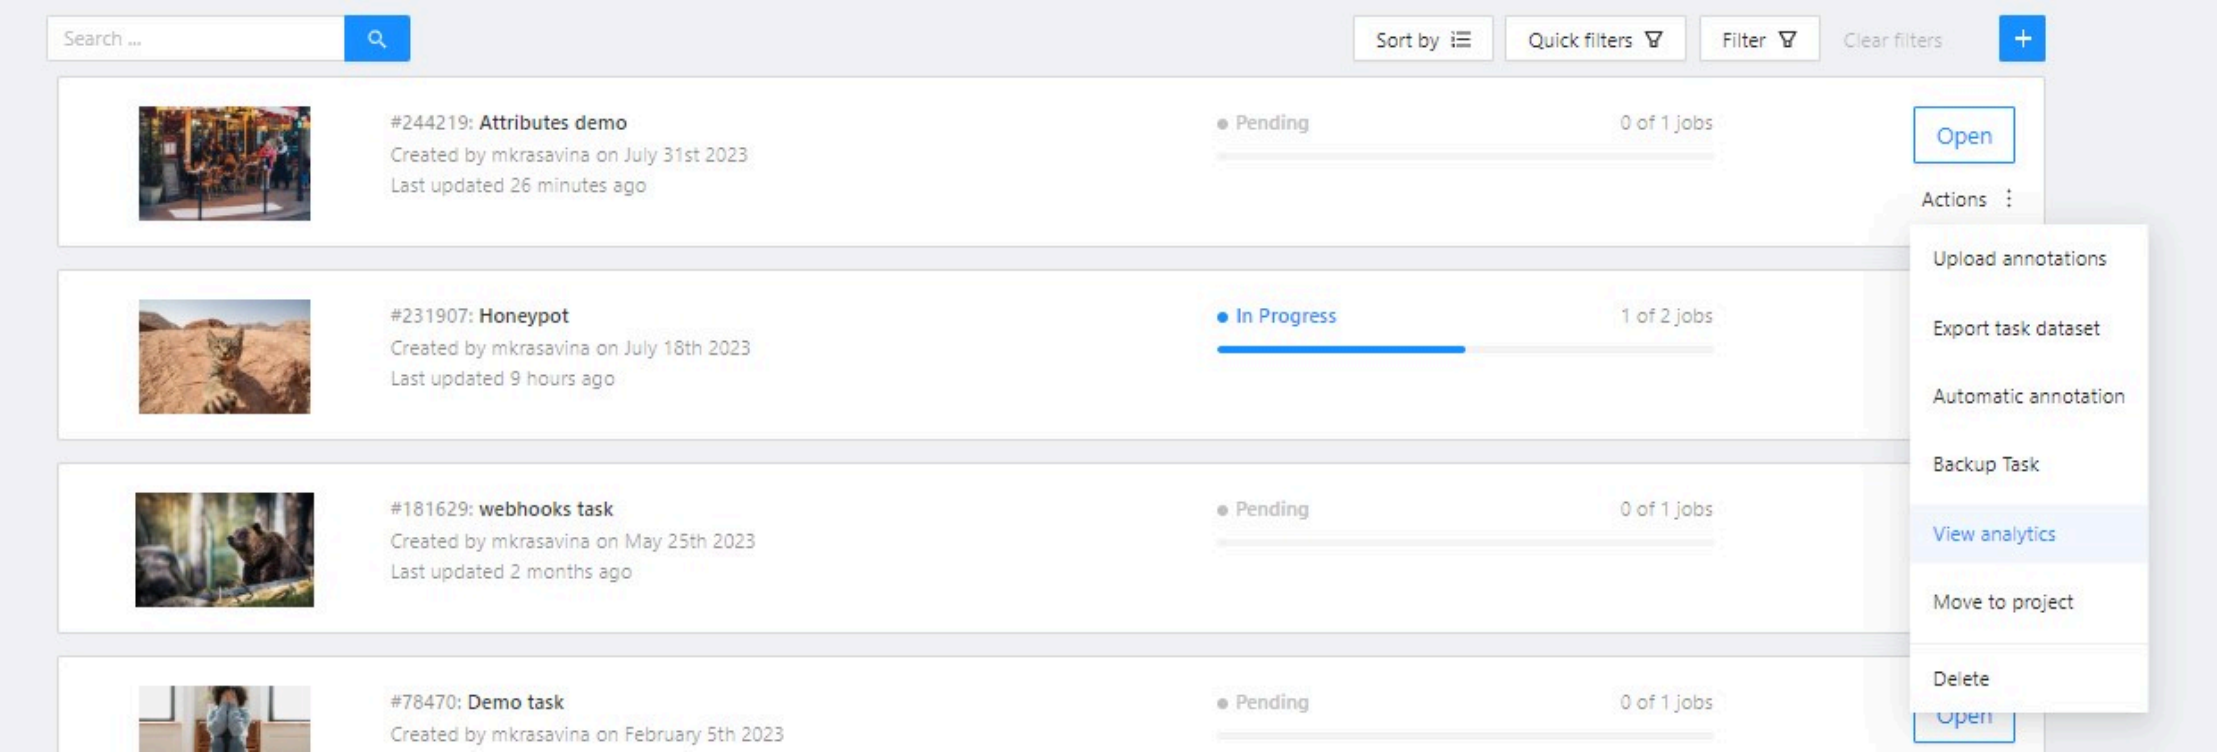

See:

- [Performance dashboard](#)
- [Performance video tutorial](#)

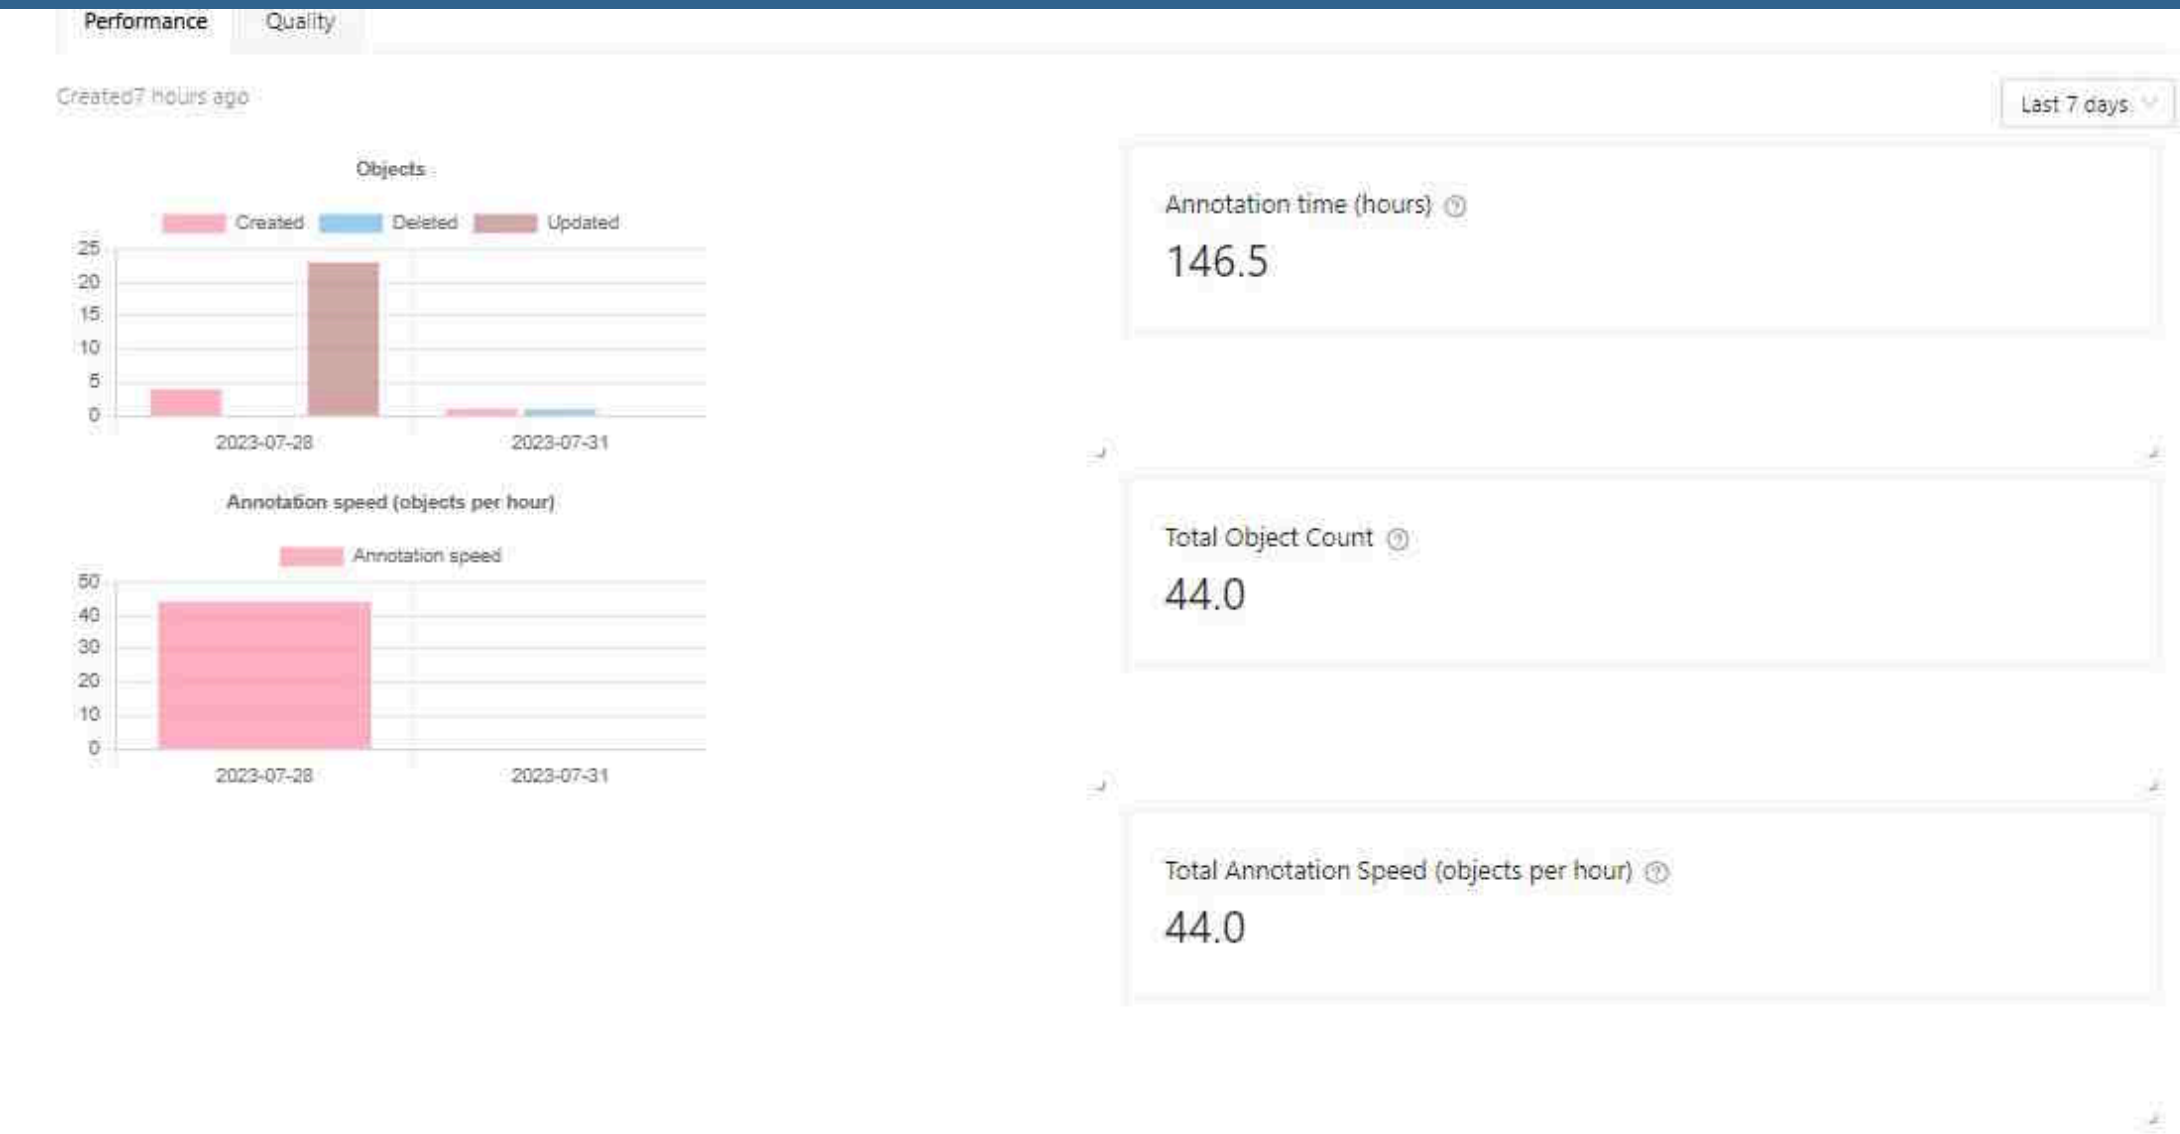

Performance dashboard

To open the **Performance** dashboard, do the following:

1. In the top menu click on **Projects/ Tasks/ Jobs**.
2. Select an item from the list, and click on three dots (:).
3. From the menu, select **View analytics** > **Performance** tab.

The following dashboard will open:

The **Performance** dashboard has the following elements:

Element	Description
Analytics for	Object/ Task/ Job number.
Created	Time when the dashboard was updated last time.
Objects	Graph, showing the number of annotated, updated, and deleted objects by day.
Annotation speed (objects per hour)	Number of objects annotated per hour.
Time	A drop-down list with various periods for the graph. Currently affects only the histogram data.
Annotation time (hours)	Shows for how long the Project/Task/Job is in In progress state.
Total objects count	Shows the total objects count in the task. Interpolated objects are counted.
Total annotation speed (objects per hour)	Shows the annotation speed in the Project/Task/Job . Interpolated objects are counted.

You can rearrange elements of the dashboard by dragging and dropping each of them.

Performance video tutorial

This video demonstrates the process:
